

ComplyWise Hospitality – Conversation Summary

User requested a compliance plugin for catering and hospitality, including full legal, GDPR, operational, and business support features.

Assistant proposed the name **ComplyWise Hospitality** and explained it as a scalable product family for multiple industries.

Core Concept: A compliance operating system helping businesses manage legal obligations, records, and audits.

Key Modules Defined:

- Setup Wizard tailored to business type
- Legal Register (laws, regulations, guidance)
- Dynamic Checklist Engine
- Logs & Records system
- Document & Policy Management
- GDPR compliance module
- Reminders & prioritisation system
- Archive & retention system
- Equipment planner
- Help & guidance for new businesses
- Add-ons system

Design Principles:

- Modular, scalable architecture
- Evidence-driven compliance
- GDPR by design
- Multi-site capability
- Audit-ready structure

Menu Structure:

Dashboard, Setup Wizard, Legal Register, Checklists, Logs & Records, Audits, Documents, Training, GDPR, Equipment, Reminders, Archive, Help, Add-ons, Settings

Smart Features Suggested:

- Compliance scoring
- Trend detection
- Recurring issue alerts
- Inspection mode

- Role-based access
- Mobile/offline support

Product Strategy:

- Product family expansion (Hospitality, Healthcare, Retail)
- Pricing tiers (Starter, Standard, Pro)
- Add-on marketplace

Technical Direction:

- WICMS plugin architecture defined
- MVC structure (Controllers, Models, Views)
- WIAjax integration approach
- Database schema planning

Commercial Layer:

- Website/landing page content created
- Value proposition defined
- Target market identified
- Monetisation strategy outlined

Pitch Deck Created:

- Problem / Solution
- Features
- Market
- Revenue model
- Roadmap and vision

Outcome:

A complete end-to-end product blueprint covering concept, structure, technical build, and commercial positioning.

Next Logical Step (not included per request):

Full backend implementation (WIAjax, controllers, UI build).
